

DISTRICT LEVEL HOUSEHOLD AND FACILITY SURVEY -4

DISTRICT FACT SHEET RAICHUR

(2012-13)

Introduction

Three rounds of District Level Household and Facility Surveys (DLHS) have been undertaken by the Ministry of Health and Family Welfare, Government of India in the past (Round-I in 1998-99, Round-II in 2002-04, and Round-III in 2007-08) with the main objective to provide reproductive and child health related database at district level in India. The data from these surveys have been useful in setting the benchmarks and examining the progress the country has made after the implementation of RCH programme. In addition, the evidences generated by these surveys have been useful for monitoring and evaluation of ongoing programmes and planning of suitable strategies by the central and state governments. In view of the completion of six years of National Rural Health Mission (2005-12), there was a felt need to focus on the achievements and improvements so far. The Ministry of Health and Family Welfare, Government of India, therefore initiated the process of conducting DLHS-4 during 2011-2012 and designated the International Institute for Population Sciences (IIPS) as the nodal agency to carry out the survey.

Bilingual questionnaires in the local language and English pertaining to Household, Clinical, Anthropometric and Bio-Chemical tests (CAB) and Ever Married Women (age 15-49) were used and canvassed using Computer Assisted Personal Interview (CAPI). The village and health facility questionnaires were canvassed by using paper & pen in DLHS-4. In the household questionnaire, information on all members of the household and socio-economic characteristics of the household, assets possessed, number of marriages, morbidities and deaths in the household since January 2008, etc. were collected. The ever-married women questionnaire contained information on women's characteristics, maternal care, immunization and childcare, contraception and fertility preferences, reproductive health including knowledge about HIV/AIDS. The village questionnaire contained information on availability of health, education and other facilities in the village, and whether the facilities are accessible throughout the year. The health facility questionnaire contained information on human resources, infrastructure, and services. For the first time, a population-linked facility survey has been conducted in DLHS-4. At the district level, all Community Health Centres and the District Hospitals and Sub Divisional Hospitals were covered. Further, all Sub-Health Centres and Primary Health Centres which were expected to serve the population of the selected PSUs were also covered. Fieldwork in Raichur was conducted during June to August 2013, gathering information from 1,766 households, 1,808 ever married women and 80 health facilities.

This fact sheet gives information on the key indicators and trend for the district of Raichur.

Indicators		(2012-13)	DLNO-3 (2007-08)
The state of the s	TOTAL	RURAL	TOTAL	RURAL
Sample Size				
Households surveyed	1766	1119	1227	907
Ever married women age15-49 years	1808	1206	1336	988
Currently married women age 15-49 years interviewed	1600	1048	1212	901
Population and household profile				
Percentage of population literate age 7+ years	60.9	52.2	60.0	53.9
Percentage of population below age 15 years	31.8	32.4	34.5	36.1
Mean household size	5.9	5.8	6.2	6.3
Sex ratio at birth (Male per 100 Female)	93.4	91.2	97.3	97.7
Percentage of households				
Having electricity	94.7	92.9	88.1	86.0
Improved source of drinking water ¹	89.3	84.6	87.9	84.9
Having access to improved toilet facility	23.7	7.3	17.9	3.3
Use clean fuel for cooking ²	20.8	6.7	12.9	2.3
Marriage				
Mean age at marriage for girls (marriages that occurred during the reference period)	19.5	19.0	19.5	19.5
Mean age at marriage for boys (marriages that occurred during the reference period)	23.9	23.8	26.4	26.5
Percentage of currently married women married below age 18 years (marriages that occurred during the reference period)	22.5	25.0	35.3	39.9
Percentage of currently married men married below age 21 years (marriages that occurred during the reference period)	17.1	18.7	28.3	32.4
Characteristics of women (%)				
Currently married women who are illiterate	60.3	72.0	63.0	73.2
Currently married women with 10 or more years of schooling	19.1	10.9	14.3	7.0
Fertility (%)				
Births to women aged 15-19 years out of total births ³	6.6	8.7	23.2	26.9
Women aged 20-24 years reporting birth order of 2 & above	64.5	63.8	67.9	71.3
Women aged 15-49 years who reported birth order of 3 & above	33.3	33.4	37.2	39.5
Women with two children wanting no more children	28.4	33.6	32.1	29.0
Mean no. of children ever born to women age 40-49 years	3.8	3.9	6.9	8.2
Current use of Family Planning Methods (%)				
Any method	51.0	49.1	49.9	48.1
Any modern method	50.8	49.0	49.3	48.0
Female sterilization	50.0	49.0	47.9	47.3
Male sterilization	0.1	0.0	0.2	0.2
Pill	0.4	0.2	0.6	0.2
IUD	0.2	0.1	0.4	0.1
Condom	0.4	0.0	0.2	0.0
Unmet Need for Family Planning (%)				
Total unmet need ⁴	8.4	9.5	16.1	16.6
Unmet Need for spacing	3.7	4.2	9.9	11.0
Unmet Need for limiting	4.7	5.3	6.2	5.6

Includes pipe water into dwelling, piped to yard/plot, public tap/standpipe/hand pump/tube well/bore well/well covered/protected spring, tanker/truck, cart with small tank/drum and packaged/bottled water. PG/PNG/Electricity/Biogas, DLHS-4 reference period is from 1-1-2008 to survey date; DLHS-3 reference period is from 1-1-2004 to survey date.

Unmet need for spacing includes fecund women who are neither pregnant nor amenorrhea, who are not using any method of family planning, and say they want to wait two or more years for their next birth. It also includes fecund women who are not using any method of family planning, and say they are unsure whether they want another child or who want another child but are unsure when to have the birth.

Unmet need for limiting includes fecund women who are neither pregnant nor amenorrhea, who are not using any method of family planning, and who want no more children (These definitions are similar to NFHS-3).

⁴Total unmet need refers to unmet need for limiting and spacing

INTERNATIONAL INSTITUTE FOR POPULATION SCIENCES

Vision: "To position IIPS as a premier teaching and research institution in population sciences responsive to

emerging national and global needs based on values of inclusion, sensitivity and rights protection."

Mission: "The Institute will strive to be a centre of excellence on population, health and development issues through high quality education, teaching and research. This will be achieved by (a) creating competent

professionals, (b) generating and disseminating scientific knowledge and evidence, (c) collaboration

and exchange of knowledge, and (d) advocacy and awareness."
